Please Note:

An October 1st submission deadline requires that MCS utilize 20th day enrollment data, which, historically, has not been fully indicative of the District's student enrollment for any given school year. To fully assess the size of the District's student population and the availability of space, it is advisable to rely on 40th day enrollment data which would necessitate an annual submission deadline of around October 20th each school year.

The only building the District is leasing as a tenant itself (Southeast Prep) does not have available classrooms.

Generally, it is advisable not to commit all of the vacant classrooms in a school building since any number of schools are likely to experience an unanticipated growth in their enrollment in any given school year due to increased birth rates, new residential development and in-migration, etc., particularly because the District is required to accommodate and make space available for all students who live within each school's attendance zone and who desire to attend that school.

Only includes schools with 6 or more available classrooms.

Please see footnotes at rear of document.

SHELBY COUNTY SCHOOLS

2013-2014 20TH DAY APPROXIMATE CLASSROOMS (CR) AVAILABLE

We have provided information concerning the schools previously closed by the District which may now be available for purchase.

At the elementary level, one classroom per school is reserved for In School Suspension (ISS).

¹To realize its academic objectives, the District identifies available capacity at elementary schools every year and often targets this space for the introduction of PreK classes.

The District is currently in the process of determining if any schools will be closed. If any schools are closed, there may not be any classrooms available at the receiving school after the completion of the school merger.

The District is committed to growing its specialized academic programs (e.g. Optional Programs, etc.) operating within various schools and will need to secure a classroom or two in the schools where these programs are operating.

Between 2012-2013 and 2013-2014, the staffing formula changed at the middle and high school level. This has affected the classrooms available at many schools.

The District's Exceptional Children Program and PreK Program both decreased the number of class locations for 2013-2014. Additionally, there were many Exceptional Children classroom locations changes. Both of these actions have affected multiple available classroom numbers, and this data is reflected in our current count of available classrooms provided here.

In association with the Partnership for Assessment of Readiness of College and Career (PARCC), we are presently reviewing capacity availability to ensure adequate classroom space to serve as mandatory "on-line" testing labs for the new assessments tied to the Common Core.

With the impending separation of six (6) municipal governments, a number of the classrooms represented here will be needed for the students in the Memphis Reserve who currently attend schools in those municipalities.

Only includes schools with 6 or more available classrooms.

Please see footnotes at rear of document.
